**Specifications**

<b>A</b> Aluminum canopy	<b>E</b> Locking set screw	<b>H</b> Micro-prismatic tempered glass lens	<b>K</b> Specular extruded aluminum reflector
<b>B</b> Chrome cap nuts	<b>F</b> Die-cast end plates	<b>J</b> Aluminum reveal plates (black)	<b>L</b> Pivoting hanger bar
<b>C</b> Bright stainless steel adjustable bracket	<b>G</b> Mitred extruded aluminum door frame with silicone gasket		<b>M</b> Recessed outlet box (by others)
<b>D</b> Aluminum yoke			

**Finish:**

Semigloss white exterior, door frame, end plates, yoke and canopy, or in custom color.

Painted surfaces – 6 stage pretreatment and electrostatically applied thermoset powder coat for stable, long lasting and corrosion resistant finish.

Reflector – extruded high purity aluminum with clear anodized specular finish. All luminaire hardware – stainless steel. All mounting hardware – zinc or cadmium plated.

**Mounting:**

Canopy mounts over recessed outlet box.

Pendant or cantilever ordered separately; specify **X** mount.

**Electrical:**

Use 90°C wire for supply connections.

Metal halide – G12 lampholder for use with single ended lamp. Remote encapsulated high reactance autotransformer ballast (35W and 70W) or electronic ballast. Electronic ballast provides improved voltage regulation, energy savings and automatic shut-off feature to eliminate end-of-life lamp cycling. For complete ballast specifications, see Accessories Section.

**Standard:**

UL listed or CSA certified for damp locations (Style 102 painted model recommended for damp locations). Where pendant or cantilever may be exposed to wind, consult factory.

**Features**

- Die-cast end plates join at articulated black reveals; machined aluminum knobs – no exposed fasteners
- All joints are gasketed – keep dirt and moisture out, prevent light leaks, maintain performance
- Non-corrosive aluminum or stainless steel construction
- Compact yet powerful – up to 150W metal halide

**Performance**

Two parabolic reflector sections drive light to the bottom of the wall. An elliptical section shields the lamp from normal viewing angles and redirects its light to a parabola. Glare is minimized and asymmetry of the beam is maximized resulting in high beam efficiency and superior surface uniformity.
